

Spoon Care / Painted Handles

I hope you enjoy using your new spoon.

After use, hand wash your spoon with soapy water, do not put it in the dish washer, pat dry after washing. It's best not to immerse the spoon or let the spoon sit in water for long periods of time.

West Country Spoons and scoops are finished with a food safe oil based on natural plant oils and waxes (sunflower oil, soya oil, thistle oil) giving a non-toxic finish that is ideal for surfaces that are expected to come into contact with food. It is 100% food-safe. Some spoons are given an additional protective food safe coat of beeswax & carnauba with antimicrobial lavender and rosemary.

Some sanded spoons may go “fluffy” after their first wetting, this is perfectly normal, just carry on using the spoon and the fluffiness will wear away in no time at all, leaving you with a beautifully smooth spoon.

Best wishes,

Emlyn
