

## **Spoon Care / Painted Handles**

I hope you enjoy using your new spoon.

After use, hand wash your spoon with soapy water, do not put it in the dish washer, pat dry after washing. It's best not to immerse the spoon or let the spoon sit in water for long periods of time.

Cornish spoons and scoops are finished with a protective coat of TopOil based on natural plant oils and waxes (sunflower oil, soya oil, thistle oil) and is food safe for humans, animals and plants and certified as suitable for use on children's toys. A further coat of beeswax & carnauba with antimicrobial lavender and rosemary is also generally added. It is 100% food-safe.

Some sanded spoons may go "fluffy" after their first wetting, this is perfectly normal, just carry on using the spoon and the fluffiness will wear away in no time at all, leaving you with a beautifully smooth spoon.
